Dear Dr Vrochides:

Thank you for agreeing to review the above manuscript, entitled

for HPB.

Please note that we normally invite three referees to review each manuscript. When two referees submit reports that are in agreement with the Editor we may be able to make a decision regarding the manuscript. If you have not submitted your report at this stage, we will notify you that your report is no longer required. In the event that you have started your report we would be pleased to receive your comments, which we will send to the author and to the Editor; however, if you have yet to start your review, we hope to save you some time by notifying you of this.

To access the manuscript and scoresheet directly, without the need to login, please click on the link below:

On the review page, there is a space for "Comments to Editor" and a space for "Comments to the Author." Please be sure to put your comments to the author in the appropriate space.

If you wish to view the manuscript and the review form simultaneously, click on the HTML or PDF icons – the manuscript will open in a new window. Leave the new window open, switch back to the main window, and open the score sheet by clicking on the Score Sheet tab. Follow the instructions for reviewers provided in the ScholarOne Manuscripts site. For revised manuscripts, the author's response letter is located on the 'Details' tab.

I strongly encourage you to elaborate on your review in the space provided. Your specific comments will offer valuable feedback to improve future work. It is essential that you click the "Save" button if you wish to exit the review before you submit it to the Editor. Otherwise, none of the information that you have entered will be saved in the system. When you have completed your review and are ready to submit it to the Editor, click on "Submit."

All communications regarding this manuscript are privileged. Any conflict of interest, suspicion of duplicate publication, fabrication of data or plagiarism must immediately be reported to me.

Finally, new keywords have been added and it would be enormously helpful to the Editors if you could edit your account information (click on the link at the top-right of the screen) to ensure that your keywords are up-to-date.

Thank you for evaluating this manuscript.

Sincerely,
